PRODUCT DATA SHEET

3DEXPERIENCE-SAP INTEGRATION

THE PRODUCT

The SAP Product Data Management Integration to 3DEXPERIENCE® (SAP Mat. No. 7020218) supports bi-directional communication between SAP S/4HANA® and 3DEXPERIENCE®.

It may be used with either SAP product data management integration to SAP S/4HANA Cloud, private edition (SAP Mat. No. 8010766) or SAP product data management integration to SAP S/4HANA (SAP Mat. No. 7020093).

It may be used with either 3DEXPERIENCE® cloud or with 3DEXPERIENCE® on premise.

THE FEATURES

- Standard integration architecture certified by SAP SE & Dassault Systèmes
- Support of hybrid architectures for cloud and on premise implementations
- Configurable mix of Dassault Systèmes and SAP applications for the relevant roles and users
- Automated data synchronization triggered by object maturity, status, etc.
- Dashboards for cross-system on demand data access
- 3DEXPERIENCE® product structure synchronization with SAP E-BOM, M-BOM and/or Document Structures
- Support of SAP MM, PP and SAP S/4HANA PEO
- Support of SAP 3D Visual Enterprise concept with 3DEXPERIENCE® visualization document services
- Foundation for cross-system release and change management
- Service packages for rapid deployment available

AREAS OF APPLICATION

The SAP Product Data Management Integration to 3DEXPERIENCE® is beneficial for customers who want to support all disciplines in their value chain with seamless business processes across both platforms.

SYSTEM REQUIREMENTS

The integration product supports releases in general availability and enhancement packages officially released by the manufacturer.

SAP

- SAP cloud
    - SAP product data management integration to SAP S/4HANA Cloud, private edition
    - SAP Mat. No. 8010766

- SAP on premise
    - Minimum version: S/4HANA 2020
    - SAP product data management integration to SAP S/4HANA
    - SAP Mat. No. 7020093

3DEXPERIENCE®

- 3DEXPERIENCE® cloud
    - PFI-OC
    - XXH-OC
    - XXK-OC

- 3DEXPERIENCE® on premise
    - Minimum version 2020x
    - MUX (User based – 1 per user)
    - TXO (Installation based – at least 1 per installation/admin)
    - EME (Installation based – at least 1 per installation/admin)
